

## Retailer accesses LoadCentral Webtool

(www.webtool.LoadCentral.net) or https://125.5.123.144/wizard and login his Username (mobile number) and Password

\* Always put a 63 instead of 0 as the pre-fix of your mobile number.

1 Your Retailer Number is displayed along with your real-time Wallet Balance.

2 **CRAWLER**  
Announcements, notices, updates and promos are placed here. Usually the font is **Red**.

### TRANSACTION STATUS

Status of your Sales transaction is displayed below the crawler. Usually the font is **Green**

## 3 How to Change Password:

1. Click the change password icon
2. Fill-up the info needed.  
Username (remember to start with 63 instead of 0)  
Old Password, New Password  
(minimum of 6 characters)

## 4 How a Retailer Makes a Sale:

1. Click the product code and select the product your customer needs.
2. Enter on the corresponding boxes the mobile number of the customer purchasing the product and quantity being purchased and click Sell Product. The optional parameter is where you will put the amount for the Globe Automax product.
3. After a successful transaction your recent sales transaction will be shown and the buyer will receive the E-Pin or the load.

Note: The quantity can only be adjusted on E-Pins and a maximum of 10 pins can be sold at one time.

**Sales Transaction Report**

Start Date: 02/22/2011      End Date: 02/22/2011      Select Format: HTML

## 5 How to resend:

1. Just place the mobile number of the buyer in the space provided.
2. Click resend
3. System will resend the E-Pin

Note: Resend is only applicable for E-Pin transactions and not for E-Loads. Also the last E-Pin bought by that mobile number is the only one that the system will resend.

## 6 How the Retailer Generates a Sale Report:

1. Click the Start Date. Select the date you want your sales report to start.
2. Click the End Date. Select the date you want your sales report to end.
3. Click Generate Sales Transaction report.

## Webtool Advantage:

- Faster and more efficient since it by-passes our access SMS #'s.
- For the e-PIN that was just sold, the details are displayed on the PC monitor. The retailer can just write it in a piece of paper in the event that there are delays in SMS.
- Even if all the carriers' SMS systems are down, The retailer can still dispense e-PINs by selling to his own account.
- A retailer can do advance selling to himself of fast-movers. He can either write it in pieces of paper or print the e-PINs. He can sell a maximum of 10 e-PINs of the same product denom per transaction.
- A static IP address offers the best security for the retailer since transaction using the web tool can only be done in his shop. The DSL ISP normally provides this.
